ABOUT ME

My first glimpse into photography was through the screen of my mom's old blackberry. I would dress up my little sisters and photograph them in our neighbor's flower garden. Somehow, those hours of giggles & play led to a real camera & an actual wedding to photograph. Although 10 years have passed since those days in the garden, I've clung to the elements of subtle beauty, effortless romance and joy that filled my soul in my youth. My husband, Bryan, & I agree that life is a true gift that we feel honored to enjoy through photography. There are no worthless moments, nothing that can't be brought to life if viewed from a different perspective.

I love my work & my little family. The best part of my work is joining arms with like-minded couples & celebrating with them on one of their happiest days.
