

Over the period of the pandemic I have replaced my camera gear to enable me to have both slow motion and smooth camera movement. This restart comes with a period of portfolio building at a steep discount. I basically have a single package that runs \$750. This includes a two camera set up for your ceremony, location sound recorded of the same, and a total of up to six hours at two locations at your event. A 10 to 12 minute narrative video is produced with three pieces of music in your preferred style. Turn around time 12 weeks, delivery is digital.
