## Hello Bride and Groom-to-be

When it comes to capturing your wedding day and creating a fun and stress-free experience, I am your photographer. My goal is to make sure everything is perfect for you. That means fixing your hair or dress in-between shots, showing you how to pose, and helping you create a wedding day timeline. As a photographer, my work is bright, joyful and elegant. I will capture both real moments as they happen and direct and pose you through out the day and don't forget all those wonderful little detail shots. This is your big day and I want you to enjoy it while I capture your love story.

## Wedding Collections

Emily Wilson Photography offers clients a variety of wedding collections to choose from. All collections include wedding timeline planning, wedding day coverage and professional edited images on a USB. Your collection will also come with an online gallery for you to share with family and friends and an online store to order prints and wall art. You can up-grade or select from add-ons to create a more customized collection.
