

To start off, we would like to share some information about how we work throughout the day! I am happy to get early footage upon your request, but typically filming begins the day of the wedding while you and your partner are getting ready. My second shooter and I will follow you throughout the entirety of the day – filming not only the big moments, but all of the little details that happen in between. We operate on a day rate, so there is no overtime charge or anything of that nature.

My standard packages are listed below.

- **The Big Day- \$2,500** This package is the most common choice and is best for large weddings. This package is for weddings that consist of a full bridal party, multiple location changes throughout the day, with a full ceremony and reception. In addition to a full edited cut of the special moments on your wedding day, you'll also receive all of the raw footage as well.
- **The Intimate Day - \$2,000** The second package is best for more intimate and remote weddings. Bridal parties should consist of six or less people, and typically attendees are only close family and friends. There are no location changes, so the ceremony and reception are on a single venue. Usually, people who choose this package will have their wedding at a family farm, a resort, etc. The ceremonies are also typically quicker than a traditional ceremony. You will receive all of the special moments on footage, similar to the previous package.
- **The Destination Package - Price varies:** Let us know when and where, then we can look more into how you'd like us to film your unique and personal wedding.

All of the packages will be uploaded online so you can share with all of your friends and family with ease, Each package will consist of all

the Special Moments – first dance, cake cutting, vows, toasts, entering and exiting the ceremony and reception, and more – along with a highlight video. You are also welcome to have all the raw footage as well! Feel free to check out some examples on my [website](#). Additionally, I wanted to share with you how we capture the Special Moments from a prior wedding, which can be found [here](#). The password is *thehancocks* to see these Special Moments.

.

Here's the thing: I completely understand that not everyone's wedding necessarily fits perfectly into these packages. I am open to discussion to make sure we capture your day the way YOU want it to look.
