When planning one of the most memorable days of your lives, shouldn't you choose only the best discjockey entertainment service?

Since 1991, Capitol City Sound has entertained guests at thousands of events. We specialize in weddings and receptions, and making your day memorable.

We use state-of-the-art, professional equipment and laptop computers to play strictly digital sound for your reception. Our computers use the latest DJ software, and contain over 75,000 songs. We have everything from the 1940's hits to today's hottest music. In addition, we will always make sure to secure your special songs ahead of the event, and if we don't already have them, we will get them. We even have the ability to download songs while at the event for last minute requests of songs we don't already have!

You will meet personally with your discjockey (via phone meeting or in-person) prior to the day of your wedding to discuss and plan all of the details (order of events, special song choices, etc.).

Optional Services

Capitol City Sound has grown to offer additional services for a "one stop shop" feel for your wedding/reception:

- **Photo Booth (open air) \$450 for 4 hours** – which allows for more than just 2-4 guests to appear in one photo, and we offer QR code printing on photos to allow for on-line access after the event to all photos taken at your event!
- **Up-lighting \$200 (12 lights) or \$125 (6 lights)** – which allows for accent lighting at your venue for that "wow factor" when you first arrive, and continued mood setting lighting throughout the entire event.
- **Unedited Videography \$425 for 4 hours** – which allows for video recording of your event when you simply want to capture the memories digitally, but do not need a movie-style video requiring hours of editing.

Our music, your memories!
