Anderson's Wedding Collections

The following are included in each of our Wedding Collections:

1. Careful editing, exposure adjustment and color balancing of all Digital Negatives.
2. Copyright printing release for all Digital Negatives you receive.
3. Michael will personally enhance each & every printed photo that we produce for you, your families and friends *and* all of your wedding album images too!
4. We employ up to 5 Canon® cameras and as many as 10 unique lenses and lots of flattering lighting at all of our weddings.
5. Lots of fun and lots of great images to remember it by!
6. A one-of-a-kind light painted wedding photograph (see below).

The World's Only Light Painting Wedding Photographers

Because of the unique custom nature of our light painting wedding photography, we must retain the copyright and all digital files. The best prints are on aluminum and our lab rocks at that.

A 12x8 metal print, or larger, is included in each of our Wedding Collections. You may upgrade to a larger size once you see the finished light painting. We will incorporate the image in your wedding album too.

Trust us, we want to create one of these for you at your wedding and maybe during your engagement session too. We will make every attempt to create a light painting at your wedding if conditions are safe to do so. If we cannot create one for you at your wedding, you may choose any of your wedding images for your metal print.
