

Thank you so much for your consideration on trusting me with your photos for your most special day. Check out the packages below, but please know we can absolutely rearrange anything to meet your needs. I am a firm believer in two things...1- you should totally trust and get along great with whoever you choose. 2-You need to walk away from your day with more than just a flashdrive of your images. I want you to have tangible memories.. not just digitals to post on social media.

I would really enjoy being able to have a quick chat about your vision and to see if we would mesh well. Not everyone is going to jive.. and that's okay. Hopefully I can at least offer some insight into weddings, and answer some questions you may have. You should really never feel pressured, or cornered by any vendors for your wedding. If we work, fabulous, if not, thats totally alright too. Find the right person. You'll know.

Congratulations, and I do hope to hear from you.

Daniel

All Packages Include

- All of the retouched high resolution digitals from our time together
- Password protected online retouched high resolution gallery for viewing and download. You can share your gallery with family and friends so they can view and download, and have the ability to hide any images
- Up to three flashdrives with all your images
- Option for family and friends to easily gift towards your photography budget

**ALL PACKAGES SIX HOURS OR MORE
INCLUDE A COMPLIMENTARY ENGAGEMENT
SESSION**

-I shoot on two premium CANON mirrorless cameras with an assortment of high end CANON lenses. Each of the cameras have two memory card slots so that in case one card gets corrupted, we still have another with all your images safe.

-In the office, I have two external hard drives each getting your images saved to them. When they are full, they go into a fireproof safe, and are replaced with new ones. This way, if the unthinkable happens and you ever lose your photos, I can always replace them.

- I am licensed and insured. (which some venues require) I have been in business for years, and this is my career. I have shot countless weddings. You can relax, and be assured that I will be here when your day has come and gone... not working some other job or part time job. You know I am professional, and can be relied on for an exceptional overall client and guest experience.

-An amazing curated online gallery that you can view, and download high resolution images. You can order your included prints along with other wonderful art straight from the gallery. You can also send the gallery along to family and friends so they can do all you can, and you don't have to worry about sending mom your photos. (you can even hide images you would like to just keep private)

-It is so very important that you trust and mesh well with whoever you choose. You are spending some good money on photography... as you should... It will be the part of your wedding that stays with you forever. Your photographer will be with you for the whole day. You have to get along great and know that they are experienced in all of the parts of a wedding that need to be documented, and are capable of handling any lighting situation. Uncle Bob may take great photos, but not only should he be present to enjoy your day, but he may lack the knowledge of all aspects of weddings, all lighting scenarios, not have the necessary license and insurance, all the gear and backup gear, and all the save-a-days that I will have. Safety pins, bobby pins, aspirin, sunblock, tissues, sewingkit, and.....more.

If I sound like I may work for you, let's schedule a time to chat over a cup of coffee, by phone, or by video chat. I would love to hear about you and your vision. If it doesn't work, hopefully I help in some small way with getting the planning juices goin'.

Please call, text, or email anytime.

Congratulations!!

Daniel
