All packages include filming with 3 cameras during your ceremony.

Without using at least 3 cameras to film a ceremony, it is IMPOSSIBLE to cover all of the needed angles you will want to see in your wedding film. Camera 1 will be placed behind the audience & will capture a wide shot of your entire wedding party. Camera 2 will be placed on the left side of the audience & will capture a close-up of the groom & all the groomsmen. Camera 3 will be placed on the right side of the audience & will capture a close-up of the bride & all the bridesmaids. You will forever have all the needed angles, for you to see & hear all of your vows & ring exchange, all over again in its entirety, as it happened, all in real time
