

PROCESS AND PRICING

Gorgeous and Green

With 15 years of floral design experience in wedding floristry, we've had the pleasure to work with hundreds of couples, maybe even a thousand. Every wedding is unique and we use our talent, experience and sustainable ethos to create designs for your wedding that not only capture the look and feel of your celebration and fit your budget, but also take into consideration the health of our planet.

THE PROCESS

We tailor all our designs to each individual couple, and will make sure to create a design plan that meets your individual needs for your venue. We start the process with an Initial Consult, usually by zoom. Then we create a Design Plan for your needs and budget, then we create a Contract and collect a Deposit to hold the date and start the working relationship. We stay in contact with you over email and phone, and the occasional zoom with planners, plan a Site Visit if necessary, and then Review the plan at the thirty day mark for any changes or additions. Once formalized, we collect the remaining balance and then Create, Deliver Setup and Install the tailored designs for your event.

PRICING

Below are some price points for our most sought after designs, however specialty designs, elaborate arrangements and unique installations are always welcome, and will be priced according to current flower and labor costs. We love creating beautiful solutions to new and unique beauty endeavors. Please inquire if you are unsure about pricing, or contact us to see up a call or zoom to start design process with us.
